Except for the section 'IUPAC Recommendations on Nomenclature and Symbols and Technical Reports from Commissions' requests for permission to reproduce material from the Journal should be addressed to the IUPAC Secretariat

It is a condition of publication that manuscripts submitted to this journal have not been published and will not be simultaneously submitted or published elsewhere. By submitting a manuscript, the authors agree that the copyright for their article is transferred to IUPAC if and when the article is accepted for publication. However, assignment of copyright is not required from authors who work for organisations which do not permit such assignment. The copyright covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature and translations. No part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means electronic, electrostatic, magnetic tape, mechanical, photocopying, recording or otherwise, without permission in writing from the copyright holder.

Photocopying Information for Users in the USA

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the International Union of Pure and Applied Chemistry for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of $02.00 per copy is paid directly to CCC, 27 Congress Street, Salem, MA 01970, U.S.A. Special requests should be addressed to IUPAC. 0033–4545/86 $02.00

Annual Subscription Rate 1987. One volume, twelve issues, £355 (UK), £420 (overseas), US $550 (USA and Canada) (including postage). Any individual whose institution takes out a library subscription may purchase a second or additional subscription for personal use at the reduced rate of US $77 (£59.50) *per annum*.

Microform Subscriptions and Back Issues. Back issues of all previously published volumes are available in the regular editions and on microfilm and microfiche. Current subscriptions are available on microfiche simultaneously with the paper edition and on microfilm at the end of the subscription year. All matters relating to orders and subscriptions, back issues and offprints should be sent to Blackwell Scientific Publications Ltd, P.O. Box 88, Oxford, England.

Advertising. Enquiries should be sent to the Advertisement Manager, Blackwell Scientific Publications Ltd, Osney Mead, Oxford OX2 0EL, England (telephone 0865 240201).

The journal is delivered to North America by accelerated surface post and subscribers there can expect to receive their copies within two weeks of British publication. Second Class postage paid at New York, NY. Postmaster, send address corrections to *Pure and Applied Chemistry*, c/o Expediters of the Printed Word Ltd, 515 Madison Avenue, New York, NY10022. Current issues for the Indian sub-continent, Australasia and the Far East are sent by air to regional distribution points from where they are forwarded to subscribers by surface mail. Any back numbers are normally despatched by surface to all regions, except North America, where they are sent by a.s.p., and India, where they are sent by air freight.

Contents

JANUARY

Plenary* and invited lectures and Rossini lecture† presented at the 9th International IUPAC Conference on Chemical Thermodynamics held in Lisbon, Portugal: 14–18 July 1986

J. C. G. Calado	iv	Foreword
K. S. Pitzer*	1	Thermodynamic properties of ionic fluids over wide ranges of temperature
J. A. Morrison*	7	Calorimetry in the study of physical adsorption
J. S. Rowlinson*	15	Statistical thermodynamics of small systems and interfaces
E. U. Franck†	25	Fluids at high pressures and temperatures
F. L. Swinton	35	Mixtures of non-polar molecules
D. H. Everett	45	Application of thermodynamics to interfacial phenomena
W. G. Chapman, K. E. Gubbins, C. G. Joslin, and C. G. Gray	53	Mixtures of polar and associating molecules
M. E. Paulaitis and G. C. Alexander	61	Reactions in supercritical fluids. A case study of the thermodynamic solvent effects on a Diels-Alder reaction in supercritical carbon dioxide
R. Walsh	69	Derivation of thermodynamic quantities from kinetic measurements
O. L. Kuskov	73	Thermodynamics of minerals of the mantle transition zone
G. M. Schneider, M. Dittmann, U. Metz and J. Wenzel	79	Kinetics of phase separation in fluid mixtures by relaxation methods: Pressure-jump experiments and selected results
D. V. Fenby	91	Heat: Its measurement from Galileo to Lavoisier
Review article		
J. Bicerano and D. Adler	101	Theory of the structures of non-crystalline solids

FEBRUARY

Plenary lectures presented at the 24th International Conference on Coordination Chemistry held in Athens, Greece: 24–29 August 1986

D. M. P. Mingos	145	Complementary spherical electron density model for coordination compounds

Yu. E. Gorbunova, Yu. K. Kokunov and Yu. A. Buslaev	155	Stereochemistry of complex tellurium(IV) fluorides
A. E. Merbach	161	Use of high pressure kinetic studies in determining inorganic substitution mechanisms
J. Halpern	173	Some aspects of the coordination and catalytic chemistry of ruthenium
J. Reedijk	181	The mechanism of action of platinum antitumor drugs

IUPAC Recommendations on Nomenclature and Symbols and Technical Reports from Commissions

Commission on Polymer Characterization and Properties (J. L. White & H. Yamane)	193	A collaborative study of the stability of extrusion, melt spinning and tubular film extrusion of some high-, low- and linear-low density polyethylene samples
Commission on Polymer Characterization and Properties (J. M. Cann)	217	The onset of runaway creep in HIPS (high impact polystyrene): a study in variability
Commission of Microchemical Techniques and Trace Analysis (A. Cedergren & W. Frech)	221	Determination of aluminium in biological materials by graphite furnace atomic absorption spectrometry (GFAAS)
Commission on Microchemical Techniques and Trace Analysis (A. A. Galuska & G. H. Morrison)	229	Distribution analysis of major and trace elements through semiconductor layers of changing matrix using secondary ion mass spectrometry (SIMS)
Commission on Electroanalytical Chemistry (W. F. Smyth & M. R. Smyth)	245	Electrochemical analysis of organic pollutants
Commission on Biotechnology (T. K. Ghose)	257	Measurement of cellulase activities

MARCH

Plenary and Section lectures presented at the 15th International Symposium on the Chemistry of Natural Products held in the Hague, the Netherlands: 17–22 August 1986

Plenary lectures

E. J. Corey	269	Enzymic lipoxygenation of arachidonic acid: mechanism, inhibition, and role in eicosanoid biosynthesis
D. C. Phillips, A. Cordero-Borboa, B. J. Sutton and R. J. Todd	279	Crystallographic studies of the β-lactamases from *B. cereus*
M. Taton, P. Benveniste and A. Rahier	287	Use of rationally designed inhibitors to study sterol and triterpenoid biosynthesis
C. Walsh, T. Begley, and A. Walts	295	Bacterial organomercury lyase: a protonolytic detoxification catalyst

S. Hanessian, A. Ugolini, P. J. Hodges, P. Beaulieu, D. Dubé and C. André — 299 — Progress in natural product chemistry by the chiron and related approaches—synthesis of avermectin B_{1a}

V. T. Ivanov, T. M. Andronova, M. V. Bezrukov, V. A. Rar, E. A. Makarov, S. A. Kozmin, M. V. Astapova, T. I. Barkova and V. A. Nesmeyanov — 317 — Structure, design, and synthesis of immunoactive peptides

K. K. Ogilvie, M. J. Damha, N. Usman and R. T. Pon — 325 — Developments in the chemical synthesis of naturally occurring DNA and RNA sequences with normal and unusual linkages

J. W. van Nispen — 331 — Synthesis and analysis of (poly)peptides

G. Stork and S. D. Rychnovsky — 345 — Iterative butenolide construction of polypropionate chains. Application to an efficient synthesis of (+)(9S)-dihydroerythronolide A

S. Takano — 353 — Synthesis of natural products using chiral glycol precursors

R. Scheffold, S. Abrecht, R. Orlinski, H-R. Ruf, P. Stamouli, O. Tinembart, L. Walder and C. Weymuth — 363 — Vitamin B_{12}-mediated electrochemical reactions in the synthesis of natural products

Section lectures

Section A: Structure, chemistry and synthesis of natural products

C. Angst — 373 — Stereoselective synthesis of β,γ-unsaturated amino acids

S. V. Kessar — 381 — Generation and trapping of α-oxa and oxo *o*-quinodimethanes for natural product synthesis

P. Welzel, D. Böttger, U. Heinz, A. Hadi Said, A. Fischer and E. Adams — 385 — A synthesis of moenocinol from isoprenoid precursors

L. Ghosez, S. Bogdan, M. Cérésiat, C. Frydrych, J. Marchand-Brynaert, M. M. Portuguez and I. Huber — 393 — Synthesis and uses of azetidiniminium salts

M. Isobe, T. Nishikawa, N. Fukami and T. Goto — 399 — Synthetic studies on a stereochemically complex natural product: designs for the total synthesis of (−)-tetrodotoxin

Section B: Organic chemistry as a life science

M. D. Bratek-Wiewiórowska, M. Alejska, M. Figlerowicz, J. Barciszewski, M. Wiewiórowski, M. Jaskólski, W. Zienlenkiewicz, A. Zielenkiewicz and M. Kamiński — 407 — Interaction of polyamines, their protonated salts and metal complexes with nucleic acid fragments

R. R. Schmidt — 415 — *De novo* synthesis of carbohydrates and related natural products

S. Shinkai 425 Switch-functionalized systems in biomimetic chemistry

W. G. J. Hol 431 Protein crystallography, computer graphics and drug design

Section C: Biopolymers and their components

J. W. Engels, W. Becker, T. Beckers, D. Hüsken and W. Wetekam 437 Chemoenzymatic synthesis of a gene for the interleukin-2 receptor.

P. Sinaÿ 445 Recent advances in the study of the binding site of heparin to antithrombin

P. Lefrancier and E. Lederer 449 Muramyl-peptides

Mini-symposium: Chemistry and development of new generations of β-lactams

R. N. Guthikonda, L. D. Cama, M. Quesada, M. F. Woods, T. N. Salzmann and B. G. Christensen 455 Modification of natural products to improve their biological properties

M. Narisada 459 Structure-activity relationships of cephem analogs

G. Franceschi, M. Alpegiani, C. Battistini, A. Bedeschi, E. Perrone and F. Zarini 467 Penems: some recent advances

A. G. Brown 475 Discovery and development of new β-lactam antibiotics

R. D. G. Cooper, B. W. Daugherty and D. B. Boyd 485 Chiral control of the Staudinger reaction

APRIL

Plenary* and invited lectures presented at the International Symposium on New Sensors and Methods for Environmental Characterization (SMEC), held in Kyoto, Japan, 10–12 November 1986

T. Fujinaga iv Foreword

*T. Fujinaga 493 Sanshi-suimei-ron—Fundamentals in environmental chemistry

Yu. A. Zolotov, G. I. Malofeeva, O. M. Petrukhin and A. R. Timerbaev 497 New methods for preconcentration and determination of heavy metals in natural water

M. Sasa 505 Recent advances in the environmental and medical sciences achieved by the biosystematic studies—with special reference to the chironomids

K. Fuwa 515 Survey of some chemical background of the environment in Japan

K. Štulík	521	Electrochemical flow measurements in environmental analysis
S. Fujiwara	531	Capacitive and conductive dynamic response of ion-selective electrodes
T. Akiyama and E. Niki	535	Ion-sensitive field-effect transistor for pK and pNa sensing
H. Freiser	539	Coated wire ion-selective electrodes and their application to environmental problems
I. Karube and E. Tamiya	545	Biosensors for environmental control
A. Mizuike	555	Recent developments in trace metal speciation in fresh water
E. D. Goldberg	565	Comparative chemistry of the platinum and other heavy metals in the marine environment
H. Tanaka, T. Nakagawa, Y. Okabayashi, H. Aoyama, T. Tanaka, K. Itoh, M. Chikuma, Y. Saito, H. Sakurai and M. Nakayama	573	Development of functional resins by modification of ion-exchange resins and their application to analytical chemistry
*B. Sansoni	579	Multi-element analysis for environmental characterization

IUPAC Recommendations on Nomenclature and Symbols and Technical Reports from Commissions

Commission on Pesticide Chemistry (J. A. R. Bates and S. Gorbach)	611	Recommended approach to the appraisal of risks to consumers from pesticide residues in crops and food commodities

MAY

Plenary lectures presented at the Second International Symposium on Quantitative Luminescence Spectrometry in Biomedical Sciences held in Ghent, Belgium: 11–14 May 1987

U. A. Th. Brinkman, G. J. de Jong and C. Gooijer	625	Use of luminescence techniques for sensitive and selective determinations in HPLC (high-performance liquid chromatography)
J. C. Hummelen, T. M. Luider and H. Wynberg	639	Functionalized adamantylideneadamantane 1,2-dioxetanes: investigations on stable and inherently chemiluminescent compounds as a tool for clinical analysis
L. J. Kricka, G. H. G. Thorpe and R. A. W. Stott	651	Enhanced chemiluminescence enzyme immunoassay
S. G. Schulman, R. N. Kelly and N. J. Gonzalez	655	Steady-state fluorimetric studies of proton-transfer kinetics of some photoexcited hydroxyaromatics in DMSO–water solutions
O. S. Wolfbeis	663	Fibre-optic sensors in biomedical sciences

IUPAC Recommendations on Nomenclature and Symbols and Technical Reports from Commissions

Commission on Molecular Structure and Spectroscopy (J. G. Grasselli)	673	Specifications for infrared reference spectra of molecules in the vapor phase (Recommendations 1987)
IUPAC-IUB Joint Commission on Biochemical Nomenclature (A. Cornish-Bowden)	683	Nomenclature of prenols (Recommendations 1986)
Commission on Macromolecular Nomenclature	691	Use of abbreviations for names of polymeric substances (Recommendations 1986)
Commission on Microchemical Techniques & Trace Analysis (A. D. Campbell)	695	Determination of fluoride in various matrices
Commission on Electroanalytical Chemistry (K. M. Kadish & J. E. Anderson)	703	Purification of solvents for electroanalysis: benzonitrile; dichloromethane; 1,1-dichloroethane and 1,2-dichloroethane
Commission on Electroanalytical Chemistry (R. Kalvoda)	715	Polarographic determination of adsorbable molecules
Commission on Biotechnology (R. Ringpfeil, B. Nagel, Th. Kreuter, M. Moo-Young & C. Rolz)	723	Recommended methods for characterization of agricultural residues and feed products derived through bioconversion

JUNE

Plenary lectures to be presented at the Third International Conference on Bioinorganic Chemistry, Noordwijkerhout, the Netherlands: 6–10 July 1987

G. W. Canters	iv	Foreword
S. J. Lippard	731	Chemistry and molecular biology of platinum anticancer drugs
H. A. O. Hill	743	Bio-electrochemistry
G. Palmer	749	Cytochrome oxidase: a perspective
D. Mansuy	759	Cytochrome P–450 and synthetic models
K. N. Raymond, M. E. Cass and S. L. Evans	771	Metal sequestering agents in bioinorganic chemistry: enterobactin mediated iron transport in *E. coli* and biomimetic applications

IUPAC Recommendations on Nomenclature and Symbols and Technical Reports from Commissions

IUPAC-IUB Joint Commission on Biochemical Nomenclature (G. P. Moss)	779	Nomenclature of tetrapyrroles (Recommendations 1986)
IUPAC-IUB Joint Commission on Biochemical Nomenclature (A. Cornish-Bowden)	833	Nomenclature and symbols for folic acid and related compounds (Recommendations 1986)

JULY

Plenary lectures presented at IMEBORON VI 'Sixth International Symposium on Boron Chemistry' held at Bechyně, Czechoslovakia: 22–26 June 1987

L. G. Sneddon	837	Transition metal promoted reactions of polyhedral boranes and carboranes
R. N. Grimes	847	Designed synthesis of multi-functional carboranes and organotransition metal–carborane complexes
N. N. Greenwood and R. Greatrex	857	Kinetics and mechanism of the thermolysis and photolysis of binary boranes
D. M. Schubert, W. S. Rees Jr., C. B. Knobler and M. F. Hawthorne	869	Studies of metallacarborane derivatives containing aluminum and silicon
H. C. Brown and B. Singaram	879	Organoboranes for synthesis—substitution with retention
Yu. N. Bubnov	895	Allylboranes—molecular design
R. Köster	907	After a third of a century in organoboron chemistry

IUPAC Recommendations on Nomenclature and Symbols and Technical Reports from Commissions

Commission on Analytical Reactions and Reagents (B. D. Flockhart and D. Thorburn Burns	915	Organic analytical reagents in nuclear magnetic resonance spectroscopy
Commission on Toxicology (B. Welz, M. S. Wolynetz and M. Verlinden)	927	Interlaboratory trial on the determination of selenium in lyophilized human serum, blood and urine using hydride generation atomic absorption spectrometry

AUGUST

Plenary and Session lectures presented at the First International Conference on Heteroatom Chemistry, Kobe, Japan: 19–24 July 1987

Plenary lectures

D. H. R. Barton and J-P. Finet	937	Bismuth(V) reagents in organic synthesis
W. Siebert	947	Remarkable properties of four-, five-, and six-membered diboraheterocycles
A. Fava, A. Bongini, V. Cerè, C. Paolucci, S. Pollicino and E. Sandri	955	Transannular addition of α-sulfinyl carbanions to unactivated double bonds. Intramolecularity as a reactivity factor

M. Ikehara, S. Nishikawa, H. Morioka, H. J. Kim, K. Fuchimura, T. Kimura, J. Adiwinata, T. Tanaka, E. Ohtsuka and S. Uesugi	965	Mechanism of hydrolysis of phosphodiesters with ribonuclease T1
C. R. Johnson	969	Unusual applications of oxygen heterocycles in synthesis
F. Wudl, G. Srdanov, B. Rosenau, D. Wellman, K. Williams, S. D. Cox and V. Yoon	975	Role of heteroatoms in the design and synthesis of organic metals
R. Appel	977	p_{π}-Double bonds between phosphorus and carbon—a challenge

Session lectures

M. Mikolajczyk	983	α-Heterosubstituted phosphonates and phosphinoxides
G. Capozzi	989	Methyl(bismethylthio)sulphonium salts and trimethylsilyl-sulphenyl halides as synthons in organo-sulphur chemistry
F. Mathey	993	Comparisons between the chemistry of phosphirenes and silirenes
G. Saito	999	Tetrachalcogenafulvalenes with outer chalcogeno substituents. Precursors of organic metals, superconductors, LB films, etc.
S. Kim	1005	Selective reductions with complex hydride reducing agents
A. Berndt, H. Meyer, G. Baum, W. Massa and S. Berger	1011	Stable germa- and stannaethenes
X-y. Li, X-k. Jiang, H-q. Pan, J-s. Hu and W-m. Fu	1015	Nucleophilic substitutions of perhalofluoroalkanes initiated by halophilic attacks
H. J. Reich and N. H. Phillips	1021	Lithium pentaalkyl/aryl stannate complexes as intermediates in the lithium–tin exchange reaction
H. Kanno	1027	An approach to a novel insect growth regulator buprofezin (Applaud®)
K. Ogura	1033	Development of sulfur compounds as synthetic reagents
M. Yoshioka	1041	Synthetic studies related to oral β-lactam antibiotics
L. N. Markovski, V. D. Romanenko and A. V. Ruban	1047	Synthesis, structure and properties of pentavalent three-coordinate phosphorus compounds
A. J. Arduengo, III	1053	Chemistry of tricoordinate hypervalent pnictogens
K. Seppelt	1057	Sulfur/carbon double and triple bonds

SEPTEMBER

Plenary and Invited lectures presented at the Eighth International Symposium on Solute-Solute-Solvent Interactions, Regensburg, FRG: 9–14 August 1987

H. L. Friedman	1063	New aspects of the theory of ionic solvation and ion–ion interactions in solution
P. Bopp	1071	Molecular dynamics computer simulations of solvation in hydrogen bonded systems
P. Turq, L. Orcil, J. P. Simonin and J. Barthel	1083	Transport properties and their coupling with ion aggregate formation
Y. Marcus	1093	Thermodynamics of ion hydration and its interpretation in terms of a common model
P. L. Huyskens	1103	Hydrogen bonds and EDA bonds formed by ions
G. M. Schneider, J. Ellert, U. Haarhaus, I. F. Holscher, G. Katzenski-Ohling, A. Kopner, J. Kulka, D. Nickel, J. Rubesamen & A. Wilsch	1115	Thermodynamic, spectroscopic and phase equilibrium investigations on polar fluid mixtures at high pressures
J. B. Gill	1127	Use of vibrational spectroscopy to examine species in solution: ion-pairing and metal–ligand complexation in liquid ammonia
H. Ohtaki	1143	Structural studies on solvation and complexation of metal ions in nonaqueous solutions
S. V. Volkov	1151	Spectroscopic investigations of molten salt systems. Theory and experiment
M. Salomon	1165	Ion–solvent effects and high energy batteries
B. Scrosati	1173	Semiconductor materials for liquid electrolyte solar cells
C-C. Chen	1177	Some recent developments in process simulation for reactive chemical systems
F. Franks	1189	Physical chemistry of small carbohydrates—equilibrium solution properties

Addendum: Section lectures from 10th International Conference on Nonaqueous Solutions (Leuven, Belgium: 17–21 August 1986) not published in Pure Appl. Chem., *Vol. 58, No. 8, August 1986*

G. A. Krestov	1203	Modern aspects of thermodynamics and structure of nonaqueous solutions
W. A. P. Luck	1215	Water in nonaqueous solvents

OCTOBER

Plenary and Selected Invited lectures presented at the Tenth International Conference on Raman Spectroscopy, Eugene, USA: 31 August–5 September 1986

J. R. Durig	iv	Preface

N. Bloembergen	1229	A Quarter century of stimulated Raman scattering
B. P. Stoicheff	1237	Generation of coherent and tunable ultraviolet radiation by scattering processes
M. Balkanski, M. Jouanne and M. Scagliotti	1247	Magnetic ordering induced Raman scattering in $FePS_3$ and $NiPS_3$ layered compounds
M. Inoue	1253	Enhanced Raman scattering by dielectric spheres
J. M. Robinson, H. M. Rojhantalab, V. L. Shannon, D. A. Koos and G. L. Richmond	1263	Monitoring surface structure and interfacial properties via second harmonic generation
S. Rodriguez and A. K. Ramdas	1269	Raman scattering by diluted magnetic semiconductors
T. Kitagawa	1285	Resonance Raman study on the role of the iron-ligand bond for functional activity of heme proteins
J. P. Taran	1295	CARS (coherent anti-stokes Raman spectroscopy) diagnostics of discharges
H. W. Schrotter and B. Lavorel	1301	High-resolution nonlinear rotation-vibrational Raman spectroscopy of gases
J. Laane	1307	Determination of vibrational potential energy surfaces from Raman and infrared spectra
J. R. Durig, J. F. Sullivan T. J. Geyer, S. E. Godbey and T. S. Little	1327	Conformational analysis of some organic molecules by gas phase Raman spectroscopy

IUPAC Recommendations on Nomenclature and Symbols and Technical Reports from Commissions

Commission on Molecular Structure and Spectroscopy (H. Q. Porter and D. W. Turner)	1343	A descriptive classification of the electron spectroscopies (Recommendations 1987)
Commission on Oils, Fats, and Derivatives (A. Hautfenne, W. D. Pocklington and J. P. Wolff)	1407	Determination of total and 'free' hexane content in extraction meals: results of a collaborative study and the standardised method
Commission on Pesticide Chemistry (N. Aharonson)	1419	Potential contamination of ground water by pesticides

NOVEMBER

Plenary lectures presented at the Thirteenth International Carbohydrate Symposium, Ithaca, NY, USA: 10–15 August 1986

	iv	International Carbohydrate Award
K. Bock	1447	Carbohydrate protein interactions: substrate specificity of enzymes used in the degradation of oligosaccharides related to starch and cellulose

G. Legler	1457	Basic monosaccharide derivatives: tools for exploring the active site of glycohydrolases and for studies in glycoprotein biosynthesis
J. P. Carver and D. A. Cumming	1465	Site-directed processing of N-linked oligosaccharides: the role of three-dimensional structure
K-A. Karlsson	1477	Glycolipids as attachment sites on animal cells for bacteria, bacterial toxins and viruses: aspects on identification and characteristics
D. M. Carlson	1489	From carbohydrates to cloning: regulation of gene expression
G. G. Stewart and I. Russell	1493	Biochemistry and genetics of carbohydrate utilization by industrial yeast strains
S. David and C. Augé	1501	Immobilized enzymes in preparative carbohydrate chemistry
T. Sumi	1509	Synthetic ventures in pseudo-sugar chemistry
S. J. Angyal	1521	Topics in carbohydrate stereochemistry

IUPAC Recommendations on Nomenclature and Symbols and Technical Reports from Commissions

Commission on Nomenclature of Inorganic Chemistry (Y. Jeannin and M. Fournier)	1529	Nomenclature of polyanions (Recommendations 1987)
Commission on Electroanalytical Chemistry (S. Rondinini, P. R. Mussini and T. Mussini)	1549	Reference value standards and primary standards for pH measurements in organic solvents and water + organic solvent mixtures of moderate to high permittivities
Commission on Oils, Fats, and Derivatives (A. Hautfenne, W. D. Pocklington and J. P. Wolff)	1561	Determination of hexane residues in oils: report on a collaborative study and the text of the standardised method

DECEMBER

Plenary lectures presented at the Eighth International Conference on Physical Organic Chemistry held in Tokyo, Japan: 24–29 August 1986

J. A. Berson	1571	Recent studies of reactive intermediates. The limits of Hund's rule in pi-conjugated non-Kekulé molecules
B. Capon, B-Z Guo, F-C Kwok and Z-P Wu	1577	Some studies on the tautomerism of heterocyclic and homocyclic compounds
R. Gleiter	1585	Pi-sigma interactions: Experimental evidence and its consequences for the chemical reactivity of organic compounds
H. Iwamura	1595	Design of organic molecules and molecular assemblies with electron spin alignment

A. J. Kirby	1605	Stereoelectronic effects on bond length and reactivity
J. Michl, J. G. Radziszewski, J. W. Downing, J. Kopecký, P. Kaszynski and R. D. Miller	1613	Bridgehead double bonds
S. Misumi	1627	Cycloaddition reactions of cyclophanes
H. Sakurai	1637	Structure and reaction controlled by strong sigma/pi interactions
P. von Ragué Schleyer	1647	A systematic survey of the effects of substituents on the structures and energies of the principal organic reaction intermediates
J. I. Seeman	1661	Recent studies on conformational analysis and steric effects

IUPAC Recommendations on Nomenclature and Symbols and Technical Reports from Commissions

Commission on High Temperature and Solid State Chemistry (G. Petzow and R. Sersale)	1673	Characterization of Si_3N_4 powders
Commission on Analytical Reactions and Reagents (E. V. Wänninen and F. Ingman)	1681	Metal buffers in chemical analysis: Part I — Theoretical considerations
Commission on Electroanalytical Chemistry (S. Rondinini, P. Longhi, P. R. Mussini and T. Mussini)	1693	Autoprotolysis constants in nonaqueous solvents and aqueous organic solvent mixtures
Commission on Equilibrium Data (M. T. Beck)	1703	Critical survey of stability constants of cyano complexes
Commission on Equilibrium Data (A. Braibanti, G. Ostacoli, P. Paoletti, L. D. Pettit and S. Sammartano)	1721	Recommended procedure for testing the potentiometric apparatus and technique for the pH-metric measurement of metal-complex equilibrium constants
Commission on Food Chemistry (G. Grimmer and J. Jacob)	1729	Recommended method for the gas chromatographic profile analysis of polycyclic aromatic hydrocarbons in smoked food
Commission on Food Chemistry (G. Grimmer and J. Jacob)	1735	Recommended method for a thin-layer-chromatographical screening method for the determination of benzo(a)pyrene in smoked food
Commission on Biotechnology (T. K. Ghose and V. S. Bisaria)	1739	Measurement of hemicellulase activities: Part I Xylanases

Subject Index

R = Commission Report; Asterisk (*) = Nomenclature Report;
000–000 = inclusive page numbers of symposium/conference

* Abbreviations for names of polymeric substances 691R
Adamantylideneadamantane 1,2-dioxetanes 639
Adsorbable molecules, polarographic determination of 715R
Adsorption, physical, calorimetry in study of 7
Agricultural residues derived through bioconversion, characterization of 723R
Allylboranes, molecular design of 895
Aluminium in biological materials, determination by GFAAS 221R
Amino acids, stereoselective synthesis of β,γ-unsaturated 373
Ammonia, liquid, ion-pairing and metal–ligand complexation in 1127
Analysis
conformational, and steric effects 1661
electrochemical, of organic pollutants 245R
for environmental characterization 579
metal buffers in chemical 1681R
of organic molecules by Raman spectroscopy 1327
of polycyclic hydrocarbons in smoked food 1729R
of (poly)peptides 331
Analytical chemistry, application of functional resins in 573
Antibiotics, β-lactam 475
oral, synthetic studies related to 1041
Antithrombin, binding site of heparin to 445
Anti-cancer drugs, platinum, chemistry and molecular biology of 731
Anti-tumour drugs, platinum, mechanism of action of 181
Aqueous organic solvent mixtures, autoprotolysis constants in 1693
Arachidonic acid, enzymic lipoxygenation of 269
Aromatic polycyclic hydrocarbons in smoked food, analysis of 1729R
Aryl stannate/lithium pentaalkyl complexes 1021
Associating molecules, mixtures of polar and 53
Autoprotolysis constants in nonaqueous and aqueous organic solvent mixtures 1693R
Avermectin B_{1a}, synthesis of 299
Azetidiniminium salts, synthesis and uses of 393

B. cereus, crystallographic studies of β-lactamases from 279
Bacteria, glycolipids as attachment sites on animal cells for 1477
Bacterial organomercury lyase, a detoxification catalyst 295
toxins, glycolipids as attachment sites on animal cells for 1477
Batteries, high energy, ion–solvent effects and 1165
Benzonitrile, purification for electroanalysis 703R
Benzo(a)pyrene in smoked food, TLC method for determination of 1735R
Binding site of heparin to antithrombin 445
Biochemistry of carbohydrate utilization by industrial yeast strains 1493
Bioconversion, characterization of agricultural residues derived through 723R
Bioelectrochemistry 743
Bioinorganic chemistry
3rd International Conference, Noordwijkerhout, July 1987 731–778
enterobactin mediated iron transport in *E. coli* 771
Biological materials, determination of Al in, by GFAAS 221R
properties, modification of natural products to improve 455
Biology, molecular, of Pt anticancer drugs 731
Biomedical sciences, fibre-optic sensors in 663
Biomimetic applications, iron transport in *E. Coli* and 771
chemistry, switch-functionalized systems in 425
Biosensors for environmental control 545
Biosynthesis, eicosanoid, role of arachidonic acid in 269
inhibitors to study sterol and triterpenoid 287
studies in glycoprotein 1457
Biosystematic studies, with special reference to chironomids 505
Bismuth(V) reagents in organic synthesis 937
Blood, determination of Se in 927R
Bond length, stereoelectronic effects on 1605
Bonds, bridgehead double 1613
Boranes, allyl-, molecular design of 895
binary, thermolysis and photolysis of 857
polyhedral, transition metal promoted reactions of 837
Boron chemistry, 6th International Symposium, Bechyně, June 1987 837–914
Bridgehead double bonds 1613
Buffers, metal, in chemical analysis 1681R
Buprofezin (Applaud®) as insect growth regulator 1027
Butenolide construction of polypropionate chains 345

Calorimetry in study of physical adsorption 7
Capacitive response of ion-selective electrodes 531
Carbanions, α-sulfinyl, transannular addition to unactivated double bonds 955
Carbohydrate(s) chemistry
13th International Symposium, Ithaca, Aug. 1986 1447–1528
de novo synthesis of 415
immobilized enzymes in preparative 1501
physical chemistry of 1189
protein interactions 1447
stereochemistry, topics in 1521
to cloning 1489
utilization by yeast strains 1493

Carbon and phosphorus, P_π-double bonds between 977
sulfur double and triple bonds 1057
Carborane(s)
complexes, organotransition metal 847
designated synthesis of multi-functional 847
metalla, derivatives containing Al and Si 869
transition metal promoted reactions of 837
CARS diagnostics of discharges 1295
Catalyst, protonolytic detoxification 295
Catalytic chemistry of Ru 173
Cellulase activities, measurement of 257R
Cephem analogs, structure–activity relationships of 459
Characterization of Si_3N_4 powders 1673R
Chemical background of environment in Japan 515
thermodynamics, 9th International Conference, Lisbon, July 1986 1–100
Chemiluminescence enzyme immunoassay 651
Chemiluminescent compounds as tools for clinical analysis 639
Chemistry of heavy metals in marine environment 565
Chemoenzymatic synthesis of a gene for the interleukin-2 receptor 437
Chiral control of the Staudinger reaction 485
glycol precursors, synthesis of natural products using 353
Chiron approaches, progress in natural products chemistry by 299
Chironomids, biosystematic studies with special reference to 505
* Classification of electron spectroscopies 1343R
Clinical analysis, chemiluminescent compounds as tools for 639
Coated wire ion-selective electrodes, application to environmental problems 539
Coherent anti-Stokes Raman spectroscopy 1295
Complexation, metal–ligand, in liquid ammonia 1127
of metal ions in nonaqueous solutions 1143
Computer graphics and drug design 431
simulations of solvation in hydrogen bonded systems 1071
Conductive dynamic response of ion-selective electrodes 531
Conformational analysis
and steric effects 1661
of organic molecules by gas phase Raman spectroscopy 1327
Constants, autoprotolysis 1693R
stability, of cyano complexes 1703R
Contamination of ground water by pesticides 1419R
Coordination and catalytic chemistry of Ru 173
chemistry, 24th International Conference, Athens, Aug. 1986 145–192
compounds, complementary spherical electron density model for 145
Critical survey of stability constants of cyano complexes 1703R
Crops, risk to consumers from pesticide residues in 611R
Crystallographic studies of β-lactamases from *B. cereus* 279
Cyano complexes, critical survey of stability constants of 1703R
Cycloaddition reactions of cyclophanes 1627
Cyclophanes, cycloaddition reactions of 1627
Cytochrome oxidase, a perspective 749
P-450 and synthetic models 759

Determination of fluoride in various matrices 695R
Developments in trace metal speciation in fresh water 555
Diboraheterocycles, properties of 4-, 5-, and 6-membered 947
Dichloroethane, 1,1-and 1,2-, purification for electroanalysis 703R
Dichloromethane, purification for electroanalysis 703R
Dielectric spheres, enhanced Raman scattering by 1253
Diels–Alder reaction, thermodynamic solvent effects on a 61
Dihydroerythronolide A, synthesis of 345
Discharges, CARS diagnostics of 1295
Distribution analysis of elements using SIMS 229R
DMSO–water solutions, proton-transfer kinetics of photoexcited hydroaromatics in 655
DNA sequences, synthesis of naturally occurring 325
Double bonds, bridgehead 1613
Drug(s)
design, protein crystallography, computer graphics and 431
mechanism of action of Pt antitumor 181
Dynamic response of ion-selective electrodes 531

E. Coli, enterobactin mediated iron transport in 771
EDA bonds and hydrogen bonds formed by ions 1103
Eicosanoid biosynthesis, role of arachidonic acid in 269
Electroanalysis, purification of solvents for 703R
Electrochemical analysis of organic pollutants 245R
flow measurements in environmental analysis 521
reactions, vitamin B_{12}-mediated 363
Electrodes, ion-selective
capacitive and conductive dynamic response of 531
coated wire, and their application to environmental problems 539
Electron density model for coordination compounds 145
* spectroscopies, a descriptive classification of 1343R
spin alignment, design of a molecular assemblies with 1595
Energies of organic reaction intermediates 1647
Enhanced chemiluminescence enzyme immunoassay 651
Enterobactin mediated iron transport in *E. coli* 771
Environment in Japan, survey of chemical background of 515
Environmental analysis, electrochemical flow measurements in 521
characterization, International Symposium, Kyoto, Nov. 1986 493–610
multi-element analysis for 579
chemistry, fundamentals in 493
control, biosensors for 545
problems, applications of ion-selective electrodes to 539
sciences, advances achieved by biosystematic studies 505
Enzyme immunoassay, enhanced chemiluminescence 651
immobilized, in preparative carbohydrate chemistry 1501
substrate specificity of 1447
Enzymic lipoxygenation of arachidonic acid 269
Equilibrium constants, pH-metric measurement of metal-complex 1721R
solution properties of small carbohydrates 1189
Extraction meals, determination of total and 'free' hexane content in 1407R
Extrusion, tubular film, of polyethylene samples 193R

Feed products derived through bioconversion, characterization of 723R
$FePS_3$ and $NiPS_3$ layered compounds, Raman scattering in 1247
Fibre-optic sensors in biomedical sciences 663
Flow measurements, electrochemical 521
Fluid mixtures, kinetics of phase separation in 79
Fluids at high pressures and temperatures 25
Fluoride, determination of, in various matrices 695R
Fluorimetric studies of proton-transfer kinetics 655
* Folic acid and related compounds, nomenclature and symbols for 833R
Food commodities, risks to consumers from pesticide residues in 611R

Galileo to Lavoisier, measurement of heat for the period 91
Gas chromatographic analysis of polycyclic hydrocarbons in smoked food 1729R
Gases, high-resolution nonlinear rotation-vibrational Raman spectroscopy of 1301
Gene, chemoenzymatic synthesis of, for interleukin-2 receptor 437
expression, regulation of 1489
Generation atomic absorption spectrometry in Se determination 927R
of α-oxa and oxo *o*-quinodimethanes 381
Genetics of carbohydrate utilization by industrial yeast strains 1493
Germa- and stannaethenes, stable 1011
GFAAS, determination of Al in biological materials by 221R
Glycohydrolases, tools for exploring active site of 1457
Glycol precursors, chiral, use in synthesis of natural products 353
Glycolipids as attachment sites on animal cells for bacteria 1477
Glycoprotein biosynthesis, studies in 1457
Ground water contamination by pesticides 1419R

Halophilic attacks initiating nucleophilic substitutions of perhalofluoroalkanes 1015
Heat, its measurement from Galileo to Lavoisier 91
Heavy metals
in natural water, preconcentration and determination of 497
in the marine environment 565
Heme proteins, functional activity of 1285
Hemicellulase activities, measurement of 1739R
Heparin, binding site of, to antithrombin 445
Heteroatom chemistry, 1st International Conference, Kobe, July 1987 937–1062
Heteroatoms in design and synthesis of organic metals 975
Heterocycles, oxygen, unusual applications in synthesis 968
Heterocyclic compounds, tautomerism of 1577
α-Heterosubstituted phosphonates and phosphinoxides 983
Hexane content in extraction meals, standard method for determination of 1407R
residues in oils, standard method for determination of 1561R
High pressure kinetic studies in determining inorganic substitution mechanisms 161
resolution nonlinear rotation vibrational Raman spectroscopy of gases 1301
Homocyclic compounds, tautomerism of 1577
HPLC, luminescence techniques for selective determinations in 625
Hund's rule in pi-conjugated non-Kekulé molecules, limits of 1571
Hydride reducing agents, selective reductions with complex 1005
Hydrocarbons in smoked food, analysis of 1729R
Hydrogen bonded systems, simulations of solvation in 1071
bonds and EDA bonds formed by ions 1103
Hydrolysis of phosphodiesters with ribonuclease T1, mechanism of 965
Hypervalent tricoordinate pnictogens 1053
IMEBORON VI, Bechyně, June 1987 837–914
Immobilized enzymes in preparative carbohydrate chemistry 1501
Immunoactive peptides, structure, design and synthesis of 317
Immunoassay, chemiluminescence enzyme 651
* Infrared reference spectra of molecules in vapor phase, specifications for 673R
spectra, vibrational potential energy surfaces from 1307
Inhibitors to study sterol and triterpenoid biosynthesis 287
Inorganic substitution mechanisms, determination using kinetic studies 161
Insect growth regulator, approach to a novel 1027
Interfacial phenomena, application of thermodynamics to 45
properties, monitoring of, via second harmonic generation 1263
Interlaboratory trial on determination of Se in serum, blood and urine 927R
Interleukin-2 receptor, chemoenzymatic synthesis of a gene for 437
Intramolecularity as a reactivity factor 955
Ion(s)
aggregate formation 1083
capacitive dynamic response of 531
coated wire 539
conductive dynamic response of 531
exchange resins, functional resins from 573
hydration, thermodynamics of 1093
hydrogen bonds and EDA bonds formed by 1103
ion interactions in solution 1063
pairing and metal–ligand complexation 1127
sensitive field-effect transistor 535
solvent effects and high energy batteries 1165
Ionic fluids, thermodynamic properties of 1
solvation and ion–ion interactions 1063
Iron–ligand bond, resonance Raman study on role of heme proteins 1285
Isoprenoid precursors, synthesis of moenocinol from 385

Japan, survey of chemical background of environment in 515

Kinetic(s)
measurements, derivation of thermodynamic quantities from 69
of phase separation by relaxation methods 79
of thermolysis of binary boranes 857
proton-transfer, of photoexcited hydroxyaromatics 655
studies, in determining inorganic substitution mechanisms 161

β-Lactam antibiotics
new 475
oral, synthetic studies related to 1041
β-Lactamases from *B. cereus*, crystallographic studies of 279
Lavoisier, measurement of heat from Galileo to 91
Ligand–metal complexation in liquid ammonia 1127
Lipoxygenation, enzymic, of arachidonic acid 269
Liquid electrolyte solar cells 1173
Lithium pentaalkyl/aryl stannate complexes 1021
tin exchange reaction 1021
Luminescence spectrometry, 2nd International Symposium, Ghent, May 1987 625–672
techniques for determinations in HPLC 625
Lyase, bacterial organomercury 295

Magnetic ordering induced Raman scattering 1247
semiconductors, Raman scattering by 1269
Mantle transition zone, thermodynamics of minerals of 73
Marine environment, platinum and other heavy metals in 565
Measurement(s)
kinetic, thermodynamic quantities from 69
of cellulase activities 257R
of heat, from Galileo to Lavoisier 91
of hemicellulase activities: Part I – Xylanases 1739R
Medical sciences, advances achieved by biosystematic studies 505
Melt spinning of polyethylene samples 193R
Metal buffers in chemical analysis 1681R
complex equilibrium constants, pH measurement of 1721R
ions in nonaqueous solutions, complexation of 1143
ligand complexation in liquid ammonia 1127
sequestering agents in bioinorganic chemistry 771
Metallacarborane derivatives containing Al and Si, studies of 869
Methyl(bismethylthio)sulphonium salts as synthons in organo-sulphur chemistry 989
Minerals of mantle transition zone, thermodynamics of 73
Mixtures of non-polar molecules 35
Modification of natural products to improve biological properties 455
Moenocinol, synthesis from isoprenoid precursors 385
Molecular assemblies with electron spin alignment 1595
biology of Pt anticancer drugs 731
dynamics computer simulations of solvation 1071
Molten salt systems, spectroscopic investigations of 1151
Monitoring surface structure and interfacial properties 1263
Monosaccharide derivatives, basic 1457
Multi-element analysis for environmental characterization 579
functional carboranes and organotransition metal–carborane complexes 847
Muramyl-peptides 449

Natural product(s)
chemistry of, 15th International Symposium, The Hague, Aug. 1986 269–492
chemistry, progress by chiron and related approaches 299
de novo synthesis of carbohydrates and related 415
modification to improve their biological properties 455
synthesis, of α-oxa and oxo *o*-quinodimethanes 381
using chiral glycol precursors 353
synthetic studies on a stereochemically complex 399
vitamin B_{12}-mediated electrochemical reactions in synthesis of 363
Natural water, preconcentration and determination of heavy metals in 497
$NiPS_3$ and $FePS_3$ layered compounds, Raman scattering in 1247
N-linked oligosaccharides, site directed processing of 1465
NMR spectroscopy, organic analytical reagents in 915R
* Nomenclature of
folic acid and related compounds 833R
polyanions 1529R
prenols 683R
tetrapyrroles 779R
Nonaqueous solutions
10th International Conference, Leuven, Aug. 1986 1203–1228
autoprotolysis constants in 1693R
solvation and complexation of metal ions in 1143
thermodynamics and structure of 1203
water in 1215
Non-crystalline solids, theory of structures of 101
Non-Kekulé molecules, pi-conjugated 1571
Non-polar molecules, mixtures of 35
Nucleic acid fragments, interaction of polyamines, their salts and metal complexes with 407
Nucleophilic substitutions of perhalofluoroalkanes 1015

Oils, standard method for determination of 'hexane' residues in 1561R
Oligosaccharides, enzymes used in degradation of 1447
N-linked, site-directed processing of 1465
Oral β-lactam antibiotics 1041
Organic analytical reagents in n.m.r. spectroscopy 915R
chemistry, physical, 8th International Conference, Tokyo, Aug. 1986 1571–1672
compounds, pi-sigma interactions 1585
metals, heteroatoms in design and synthesis of 975
tetrachalcogenafulvalenes as precursors of 999
molecules, conformational analysis by gas phase Raman spectroscopy 1327
design of, with electron spin alignment 1595
pollutants, electrochemical analysis of 245R
reaction intermediates, effects of substituents on structures 1647
solvent mixtures, autoprotolysis constants in 1693R
solvents, pH measurements in 1549R
synthesis, Bi(V) reagents in 937
Organoboranes for synthesis 879
Organoboron chemistry, after a third of a century in 907
Organomercury lyase, bacterial: a protonolytic detoxification catalyst 295
Organo-sulphur chemistry, synthons in 989
Oxygen heterocycles in synthesis, unusual applications of 969

Penems, some recent advances 467
Pentavalent three-coordinate phosphorus compounds 1047

Peptides, immunoactive, structure, design and synthesis of 317
muramyl- 449
Perhalofluoroalkanes, nucleophilic substitutions of 1015
Pesticide residues in crops and food commodities, risks to consumers from 611R
Pesticides, potential contamination of ground water by 1419R
Phase equilibrium, investigations on polar fluid mixtures 1115
separation, kinetics in fluid mixtures 79
pH measurements
in organic solvents and water + organic solvent mixtures 1549R
of metal complex equilibrium constants 1721R
Phosphinoxides and phosphonates, α-heterosubstituted 983
Phosphirenes and silirenes, comparisons between chemistry of 993
Phosphodiesters, hydrolysis with ribonuclease T1 965
Phosphonates and phosphinoxides, α-heterosubstituted 983
Phosphorus and carbon, P_π-double bonds between 977
compounds, pentavalent three-coordinate 1047
Photoexcited hydroxyaromatics, proton-transfer kinetics of 655
Photolysis of binary boranes, kinetics and mechanism of 857
Physical adsorption, calorimetry in study of 7
chemistry of small carbohydrates 1189
organic chemistry, 8th International Conference, Tokyo, Aug. 1986 1571–1672
Pi-conjugated non-Kekulé molecules, limits of Hund's rule in 1571
Pi-sigma interactions
consequences for reactivity of organic compounds 1585
structure and reaction controlled by 1637
pK and pNa sensing, ion-sensitive field-effect transistor for 535
Platinum and other heavy metals in marine environment 565
anticancer drugs, chemistry and molecular biology of 731
anti-tumor drugs, mechanism of action of 181
Pnictogens, tricoordinate hypervalent 1053
P_π-double bonds between phosphorus and carbon 977
Polar and associating molecules, mixtures of 53
fluid mixtures at high pressures 1115
Polarographic determination of adsorbable molecules 715R
Pollutants, organic, electrochemical analysis of 245R
Polyamines, interaction with nucleic acid fragments 407
* Polyanions, nomenclature of 1529R
Polycyclic aromatic hydrocarbons in smoked food, recommended analysis of 1729R
Polyethylene samples, extrusion, melt spinning and tubular film extrusion 193R
Polyhedral boranes, transition metal promoted reactions of 837
* Polymeric substances, abbreviations for names of 691R
Polypeptides, synthesis and analysis of 331
Polypropionate chains, iterative butenolide construction of 345
Polystyrene, high impact, runaway creep in 217R
Potentiometric apparatus for pH-metric measurement, recommendations for testing 1721R
* Prenols, nomenclature of 683R
Pressure jump experiments 79
Primary standards for pH measurements in organic solvents 1549R
Process simulation for reactive chemical systems 1177
Properties of pentavalent three-coordinate phosphorus compounds 1047
equilibrium solution, of small carbohydrates 1189
Protein
carbohydrate interactions 1447
crystallography 431
Proton-transfer kinetics of photoexcited hydroxyaromatics 655
Pseudo-sugar chemistry, synthetic ventures in 1509
Purification of solvents for electroanalysis 703R

Quantitative luminescence spectrometry in biomedical sciences, 2nd International Symposium, Ghent, May 1987 625–672
Quinodimethanes, generation of α-oxa and oxo *o*-, for synthesis 381

Raman spectra, vibrational potential energy surfaces from 1307
scattering by diluted magnetic semiconductors 1269
enhanced by dielectric spheres 1253
in $FePS_3$ and $NiPS_3$ layered compounds 1247
stimulated 1229
spectroscopy, 10th International Conference, Eugene, Aug/Sept. 1986 1229–1342
coherent anti-Stokes, for diagnostics of discharges 1295
gas phase, conformational analysis of organic molecules by 1327
high-resolution nonlinear rotation-vibrational, of gases 1301
study on role of iron-ligand bond 1285
Reaction controlled by sigma/pi interactions 1637
Reactions in supercritical fluids 61
Reactive chemical systems, process simulation for 1177
intermediates, studies of 1571
Reactivity, stereoelectronic effects on bond length and 1605
Reductions, selective, with complex hydride reducing agents 1005
Reference value standards for pH measurements in organic solvents 1549
Relaxation methods, in kinetics of phase separation in fluid mixtures by 79
Resins, development of functional 573
Ribonuclease T1, mechanism of hydrolysis of phosphodiesters with 965
RNA sequences, synthesis of naturally occurring 325
Rotation-vibrational Raman spectroscopy of gases 1301
Runaway creep in high impact polystyrene 217R
Ruthenium, coordination and catalytic chemistry of 173

Salt systems, molten, spectroscopic investigations of 1151
Sanshi-suimei-ron 493
Scattering processes, generation of coherent and tunable u.v. radiation by 1237
Raman 1229

Second harmonic generation, monitoring surface structure via 1263
Selective reductions with complex hydride reducing agents 1005
Selenium in lyophilized human serum, blood and urine, determination of 927R
Semiconductor(s)
layers of changing matrix, distribution analysis of elements through 229R
materials for liquid electrolyte solar cells 1173
Raman scattering by diluted magnetic 1269
Sensors and methods for environmental characterization, International Symposium, Kyoto, Nov. 1986 493–610
fibre-optic, in biomedical sciences 663
Serum, lyophilized human, determination of Se in 927R
Sigma-pi interactions, structure and reaction controlled by strong 1637
Silirenes and phosphirenes, comparisons between chemistry of 993
SIMS, distribution analysis of elements using 229R
Simulation for reactive chemical systems 1177
Si_3N_4 powders, characterization of 1637R
Smoked food
GCP analysis of polycyclic aromatic hydrocarbons in 1729R
TLC method for determination of benzo(a)pyrene in 1735R
Solar cells, liquid electrolyte, semiconductor materials for 1173
Solids, non-crystalline, theory of structures of (review) 101
Solute–solute–solvent interactions, 8th International Symposium, Regensburg, August 1987 1063–1202
Solvation and complexation of metal ions, structural studies on 1143
in hydrogen bonded systems 1071
Solvent(s)
autoprotolysis constants in 1603R
for electroanalysis, purification of 703R
ion effects and high energy batteries 1165
mixtures, aqueous organic, autoprotolysis constants in 1693R
* Spectra, infrared, of molecules in vapour phase, specifications for 673R
Spectroscopy (-ies, -ic)
* electron, a descriptive classification of 1343R
gas phase Raman, conformational analysis by 1327
investigations of molten salt systems 1151
n.m.r., organic analytical reagents in 915R
Raman, high-resolution nonlinear rotation-vibrational, of gases 1301
vibrational potential energy surfaces from 10th International Conference, Eugene, Aug./Sept. 1986 1307
1229–1342
on polar fluid mixtures 1115
vibrational, use of, to examine species in solution 1127
Spectrometry, hydride generation atomic absorption, determination of Se using 927R
Spheres, dielectric, Raman scattering by 1253
Spherical electron density model for coordination compounds 145
Stability constants of cyano complexes, critical survey of 1703R
of extrusion, melt spinning and tubular film extrusion of polyethylene samples 193R
Standards, reference value and primary, for pH measurements 1549R
Stannaethenes, stable germa- and 1011
Starch and cellulose, enzymes used in degradation of oligosaccharides related to 1447
Statistical thermodynamics of small systems and interfaces 15
Staudinger reaction, chiral control of 485
Stereochemically complex natural product, synthetic studies on a 399
Stereochemistry of complex Te(IV) fluorides 155
topics in carbohydrate 1521
Stereoelectronic effects on bond length and reactivity 1605
Stereoselective synthesis of β,γ-unsaturated amino acids 373
Steric effects, studies on conformational analysis and 1661
Sterol biosynthesis, rationally designed inhibitors to study 287
Structure(s)
activity relationships of cephem analogs 459
and reaction controlled by strong sigma/pi interactions 1637
and thermodynamics of nonaqueous solutions 1203
design, and synthesis of immunoactive peptides 317
of non-crystalline solids, theory of 101
of organic reaction intermediates, effects of substituents on 1647
of pentavalent three-coordinate phosphorus compounds 1047
Substituents, effects on principal organic reaction intermediates 1647
Substitution mechanisms, inorganic, determination using kinetic studies 161
Sulfur compounds as synthetic reagents, development of 1033
carbon double and triple bonds 1057
Sulphenylhalides and sulphonium salts as synthons in organo-sulphur chemistry 989
Supercritical fluids, reactions in 61
Surface structure, monitoring of, via second harmonic generation 1263
Survey of chemical environment in Japan 515
Switch-functionalized systems in biomimetic chemistry 425
Synthesis of
a gene for the interleukin-2 receptor 437
avermectin B_{1a} 299
azetidiniminium salts 393
carbohydrates and related natural products 415
(1) (9S)-dihydroerythronolide A 345
immunoactive peptides 317
moenocinol from isoprenoid precursors 385
multi-fractional carboranes 847
organotransition metal–carborane complexes 847
natural products using chiral glycol precursors 353
naturally occurring DNA and RNA sequences 325
organic metals, heteroatoms in 975
pentavalent three-coordinate phosphorus compounds 1047
(poly)peptides 331
βγ-unsaturated amino acids, stereoselective 373
vitamin B_{12}-mediated electrochemical reactions 363
Synthesis, application of oxygen heterocycles in 969
Bi(V) reagents in organic 937
Synthetic reagents, development of sulfur compounds as 1033
studies on a stereochemically complex natural product 399
related to oral β-lactam antibiotics 1041
ventures in pseudo-sugar chemistry 1509
Synthons in organo-sulphur chemistry 989

Tautomerism of heterocyclic and homocyclic compounds 1577
Tellurium(IV) fluorides, stereochemistry of complex 155
Tetrachalcogenafulvalenes with outer chalcogeno substituents 999
* Tetrapyrroles, nomenclature of 779R
Tetrodotoxin(−), designs for total synthesis of 399
Thermodynamic(s)
and structure of nonaqueous solutions 1203
application to interfacial phenomena 45
chemical, 9th International Conference, Lisbon, July 1986 1–100
investigations on polar fluid mixtures 1115
of ion hydration 1093
of minerals of the mantle transition zone 73
properties of ionic fluids 1
quantities from kinetic measurements 69
solvent effects on a Diels–Alder reaction 61
statistical, of small systems and interfaces 15
Thermolysis of binary boranes, kinetics and mechanism of 857
Three-coordinate pentavalent phosphorus compounds 1047
Tin/lithium exchange reaction 1021
TLC determination of benzo(a)pyrene in smoked food 1735R
Trace metal speciation in fresh water 555
Transannular addition of α-sulfinyl carbanions to unactivated double bonds 955
Transistor for pK and pNA sensing 535
Transition metal promoted reactions of polyhedral boranes and carboranes 837
Transport properties and their coupling with ion aggregate formation 1083
Trapping of α-oxa and oxo *o*-quinodimethanes 381
Tricoordinate hypervalent pnictogens 1053
Trimethyl-sulphenyl halides as synthons in organo-sulphur chemistry 989
Triterpenoid biosynthesis, rationally designed inhibitors to study 287
Tubular film extrusion of polyethylene samples 193R

Ultraviolet radiation, generation of coherent, by scattering processes 1237
Urine, determination of Se in 927R

* Vapour phase, specifications for i.r. reference spectra of molecules in 673R
potential energy surfaces from Raman and i.r. spectra 1307
Vibrational spectroscopy to examine species in solution 1127
Viruses, glycolipids as attachment sites on animal cells for 1477
Vitamin B_{12} electrochemical mediated reactions in synthesis 363

Water
fresh, trace metal speciation in 555
ground, potential contamination by pesticides 1415R
in nonaqueous solvents 1215
natural, determination of heavy metals in 497
+ organic solvent mixtures, pH measurements in 1549R

Xylanases, measurement of hemicellulase activities 1739R

Yeast strains, carbohydrate utilization by industrial 1493
